

Consumer Health Information Service Subject Headings  
from the Consumer Health Information Service of the Toronto Public Library, 2003;  
Updated April, 2009

This is an example of an institution specific subject file system that was organized according to the National Library of Medicine's Medical Subject Headings (MeSH). The former Consumer Health Information Service of the Toronto Public Library filed material alphabetically using MeSH.

MeSH headings are in BOLD CAPITAL PRINT. Natural language terms are included for greater ease of use and accessibility to MeSH. Natural language terms are in small print. Natural language terms have "see" cross-references to MeSH terms. Synonyms and related terms are indicated through the use of "see also" cross-references.
